LEVELING UP
GREEN GROWTH IMPACTS

Jina Hur, Ph.D., Research Scientist, Korea's Rural Development Administration (RDA)

Dr. Jina Hur is a research scientist at the Climate Change Assessment Division of the Rural Development Administration. She specializes in predicting agro-climatic variability that are likely to occur in the near-future using Sub-seasonal to Seasonal (S2S) prediction systems. Furthermore, her research area extends to climate-related risk assessment associated with agriculture sector at regional to local scales.

Daehoon Oh, Senior Manager at National Information Society Agency (NIA), Korea

Mr. Daehoon Oh is a senior manager at the National Information Society Agency (NIA), specializing in international studies and AI public policies. He previously worked as a Young Professional at the KOICA (Korea International Cooperation Agency) office in Guatemala, where he implemented international development cooperation projects for Guatemalan government agencies. Since 2019, he has been involved in managing ICT (Information and Communication Technology) Cross-Sectoral Joint Technical Assistance projects with international organizations such as the World Bank, ASEAN, UNDP, and Digital Government Cooperation Programs for the partner countries.

Tomas Rosada, Senior Agriculture Economist, World Bank

Senior Agriculture Economist at the World Bank Group (WBG), currently working in Eastern and Southern Africa. He has also worked in Latin America and the Caribbean. His areas of professional interest are agriculture innovation, digital agriculture, and agriculture financing.

Before joining the WBG, Doctor Rosada served as Regional Economist for Latin America and the Caribbean and Country Program Manager for Mexico and Cuba at the International Fund for Agricultural Development (IFAD) of the United Nations. While at IFAD he also served as Principal Technical Advisor and reviewer of country strategies and designed and supervised various rural development investment loans and grants in the region.
