OCTOBER 17-19, 2023

CAIRO

LEVELING UP
GREEN GROWTH IMPACTS

Taiwhan Kim, Senior Manager, K-Water

Taiwhan KIM is a principal specialist who joined K-Water (Korea Water Resources Corporation) since 2005, which is a governmental corporation of South Korea in charge of water resources management. He is now seconded to the Water Sciences Division of UNESCO HQ as a loaned expert.

Gi Hye Shin, Senior Manager, K-Water Academy

Dr. Gihye Shin is an expert in water resources and environment and received her PhD from the University of Texas at Austin, U.S. with a research on a subgrid approach for hydrodynamic modeling. She has worked in domestic and international water projects at K-water since 2004. Dr. Shin is currently in charge of knowledge sharing and MDB technical assistance projects at K-water Academy.

Ighyun CHO, Team Manager, Civil Engineer, Korea Environment Corporation (shortly "K-eco")

Mr. Ighyun CHO is a team manager and in charge of overseas projects at the Korea Environment Corporation. His expertise is in implementing of sewerage and waste-landfill projects in Korea and several developing countries. He has experiences carrying out several ODA projects in Cote d'Ivoire, DR Congo, Indonesia and Kazakhstan as a project manager.

Since 2022, he has been conducting faecal sludge treatment projects in Mongolia and Uganda using Green ODA fund from the Ministry of Environment, Korea.
